Where  
Kids Get  
Special  
Care

Thank you for registering for the Pediatric Advanced Life Support Course (PALS), provided by Lutheran Children's Hospital and developed by the American Heart Association in conjunction with the American Academy of Pediatrics. The course details are as follows:

## **Location: Lutheran Hospital of Indiana**

### **Room: 7836 Building, Lower Level, Education Center**

Included in this packet, you will find a PALS Pre-Test, a Self-Assessment, and directions to your course site.

You will need to complete the pretest before coming to class. We recommend that you review the PALS Course Guide and Provider Manual prior to class to assure that you are adequately prepared. There will be a written exam and case scenarios covering the materials in the manual, videos, and teaching and skill stations. A passing score of 84% on the written exam as well as meeting the core requirements of the case scenarios will be required to successfully complete the course. Healthcare Providers CPR completion is encouraged but not required for entrance into this class; however, you are responsible for this knowledge.

If you have any questions prior to class, please do not hesitate to contact me at (260) 435-7312 or (419) 799-9653.

Kelli Breininger, RN  
Regional Faculty, PALS
